DB2L^AT_EX: `test_callout`

James Devenish

January 9, 2004

This file tests the following elements and variables:

`callout    area    imageobjectco    mediaobjectco    screenco`

1   Callouts for Images with Automatic Overlays

Attempts to overlap some LATEX code onto a PDF image. In the centre of each area is a callout symbol.
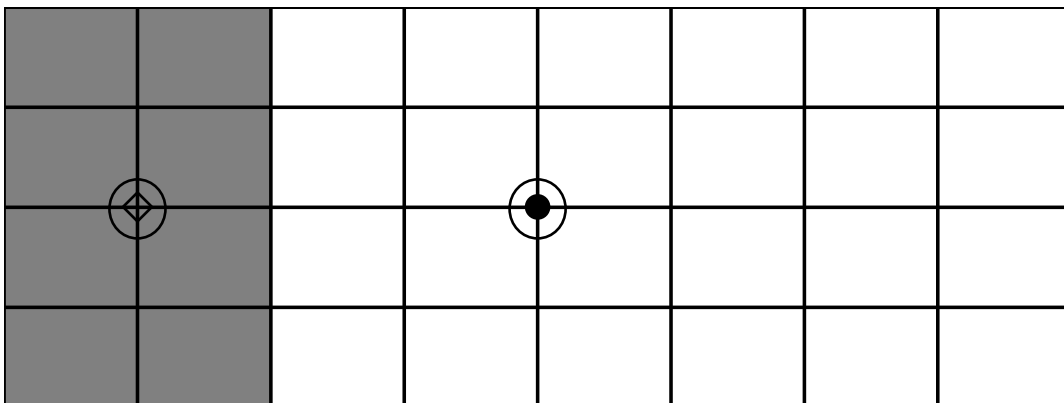

Descriptions:

⊘. This callout refers to an area that occupies the shaded region of the image.

⊙. This callout refers to a point that is located in the centre of the image.

⊘ **and** ⊙. This callout refers both the previous areas.

Here is a small version of the same image shown above:

2 Callouts for Line-by-line Text

You cannot use `co`. Instead, you can use line numbering.

```
1  The quick brown
2  fox jumps over
3  the lazy dog.
```

Line 2. This callout refers to the second line.

Lines 1–3. This callout refers to all lines.
